

GEO CIRCLE

from the view
of Nymburk
students

This is our
Project
team with
our project
partners
from Haan

Our goals in Geo Circle Project

During the project time, we have focused on:

- School aquaponic garden
- Finding the circular economy challenges
- To share our knowings to other student, citizens

The Client

Name of the company : Farm for everyone

Address : Okružní 2162, 28802, Nymburk

Director General : Bohuslav Škoda

Web page : <http://farmaprovsechny.cz/>

Contact : +420 724 757 709

FARMA[®]
PRO VŠECHNY

What is Aquaponia?

- It's an ecological system of intensive fish breeding in artificial tanks and pumping of the water into a hydroponic part in which the plants take part of the nutrients for their growth.

AQUAculture + hydroPONIC = **AQUAPONIC**

The Research

Our Project - Aquaponic

As is known, we have started our cooperation with the Client during the Geo Water project. At the Geo Circle project, we add to this activity another dimension.

We focused on the relationship between the environmental productivity of plants at our school and their following delivery to the school canteen. This distribution were connected with the workshop and courses about the necessity of upcycling.
